#### Answer:

Explanation:

Explanation

Step 1: Connect to SQLDB1 by using Microsoft SQL Server Management Studio (SSMS) Step 2: In SQLDB1, create contained database users.

Create a contained user in the database that represents the VM's system-assigned identity.

Step 3: In Azure AD, create a system-assigned managed identity. A system-assigned identity for a Windows virtual machine (VM) can be used to access an Azure SQL server.

Managed Service Identities are automatically managed by Azure and enable you to authenticate to services that support Azure AD authentication, without needing to insert credentials into your code.
