Company needs an EDM solution for their invoice. Which of the following should be considered first when Company's requirements are assessed?

- A. The quantity of invoices they process.
- B. Document source of invoices such as paper or electronic.
- C. Peak volume of invoice processing.
- D. Retention period for invoices.

Answer: A

NEW QUESTION: 4

A Process is fed cases to work from a spreadsheet held in a shared drive. The location of the shared drive is different between Development and Production environments. How should this be managed?

- A. During the build and test phase, hold the 'Development' path to the spreadsheet in a data item within a Process. When the Process is imported into Production it will be opened and the data item will be amended to hold the 'Production' path.
- B. Pass the Path as a Startup Parameter when the process starts
- C. During the build and test phase, hold the 'Development' path to the spreadsheet in a data item within a Process. Expose this data item as a Session Variable. When the Process is run in Production, this Session Variable value can be set in Control Room
- D. Hold the Path to the spreadsheet as an Environment Variable

Answer: C
