NEW QUESTION: 1

When a BGP speaker advertises a route learned from an EBGP peer to a GP peer, what is the next attribute set to?

- A. Local router loopback address
- B. Does not change the next hop attribute of the router information
- C. Interface address for establishing an IBGP neighbor

relationship between the local and the peer

D. Interface address of the EBGP neighbor relationship established between the local and the peer that learned the route.

Answer: B

NEW QUESTION: 2

Which of the following disposal methods could result in a HIPAA violation for a covered entity?

A. Sanitizing or physically destroying electronic storage media

B. Recycling documents through municipal waste management

C. Shredding, burning, pulping, or pulverizing paper records

D. Contracting outside entities for transport and remote disposal

Answer: B

NEW QUESTION: 3

Note: This question is part of a series of questions that present the same scenario. Each question on the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are planning to create a virtual network that has a scale set that contains six virtual machines (VMs).

A monitoring solution on a different network will need access to the VMs inside the scale set.

You need to define public access to the VMs.

Solution: Deploy a standalone VM that has a public IP address to the virtual network.

Does the solution meet the goal?

A. Yes

B. No

Answer: A

Explanation:

Explanation/Reference:

Public IP addresses are necessary because they provide the load balanced entry point for the virtual machines in the scale set. The public IP address will route traffic to the appropriate virtual machines in the scale set.
