ã»ÿã, <ã•®ã®ã... "ãªã, ½ãfªãfÿãf¼ã, •ãf§ãf³ã, 'ççèª•ã-ã•|ã•ã•ã•ã•ã•„ã€,

Explanation

for EBGp and IBGP lab you have to make correction to the configuration in a router R1.

You have only access to Router R1.

R1 and RA should be neighbors through EBGp.

in R1 you will find this command:

(config-router)#Neighbor 209.165.277.2 remote-as 64525

The ip address here is wrong , delete this command using :

(config-router)#No Neighbor 209.165.277.2 remote-as 64525

And replace it with new command with right ip of RA E0/1 interface

by typing this command:

(config-router)#Neighbor 209.165.201.2 remote-as 64525

R1 and R2 and R3 are neighbors through IBGP, and R1 use the

peer-group IBGP to form neighborhood between R1 and R2, and between R1 and R3, but actually there is an issue with the IBGP peer-group commands in R1. You will find in R1 the following commands:

```
(config-router)#neighbor IBGP peer-group
(config-router)#neighbor IBGP remote-as 64550
(config-router)#neighbor IBGP next-hop-self
(config-router)#neighbor IBGP update-source loopback 0
```

You must correct the Remote-AS for the Peer-Group to 64520 to form the neighborhood correctly.

Watch Out! If you delete the config with " " you also will delete the following lines:

```
(config-router)#neighbor IBGP peer-group
(config-router)#neighbor IBGP next-hop-self
(config-router)#neighbor IBGP update-source loopback 0
```

So don't delete the line regarding the "remote-as".

Just replace it with:

```
(config-router)#neighbor IBGP remote-as 64520
```

In the scenario regarding the Lab, they tell you how the routing-table should look if you have done everything right! So if your routing-table on R1 looks like the one they posted in the scenario you have done everything right and can go on to the next topic.

You have to use the command "#show ip bgp " to show BGP routing table, don't use "#show ip route" command

NEW QUESTION: 2

Which @Function can be used to unlock a document?

- A. @DocLock[Unlock]
- B. @DocUnlock
- C. @Unlock
- D. @UnlockNote

Answer: A

NEW QUESTION: 3

A customer is running IBM i 7.1 on a Power 720 and needs to track sign-on activity. Which of the following should be recommended?

- A. Tivoli Advanced Audit for IBM i
- B. IBM i Security Assessment Tool (iSAT)
- C. IBM i Risk Check Tool
- D. IBM i Security Audit Journal

Answer: D

NEW QUESTION: 4

Tony is supervising a work crew at the post office. Every day, his clients are supposed to check each waste bin and empty those that contain trash. Tony takes data on the number of waste bins emptied by the crew. In order to report data in terms of percentage of occurrence Tony MUST also know:

- A. how many waste bins contained trash.
- B. that some waste bins contained trash.
- C. This behavior is not amenable to percent of occurrence reporting.
- D. how many waste bins were in the office.

Answer: A
