Now we have free demo of the 500-444 Ebook study materials exactly according to the three packages on the website for you to download before you pay for the 500-444 Ebook practice engine, and the free demos are a small part of the questions and answers.

NEW QUESTION: 1

In pricing, which of the following statements are correct for condition maintenance?

There are 2 correct answers to this question.

Response:

- A.** General Condition maintenance in the SAP CRM system can be carried out by using the CRM Webclient UI.
- B.** Within condition records, the number of levels in a value scale is limited to five.
- C.** A condition maintenance group bundles condition types and condition tables for condition maintenance.
- D.** In general condition maintenance context (GCM), you can maintain you can maintain conditions that are in the condition maintenance group and that are assigned to the GCM.

Answer: C,D

NEW QUESTION: 2

Which definition is included in a Cisco UC on UCS TRC?

- A.** configuration of virtual-to-physical network interface mapping
- B.** required RAID configuration, when the TRC uses direct-attached storage

C. configuration settings and patch recommendations for VMware software

D. step-by-step procedures for hardware BIOS, firmware, drivers, and RAID setup

E. server model and local components (CPU, RAM, adapters, local storage) by name only; part numbers are not included because they change over time

Answer: B

Explanation:

Explanation/Reference:

Explanation:

Definition of server model and local components (CPU, RAM, adapters, local storage) at the orderable part number level. Required RAID configuration (e.g. RAID5, RAID10, etc.) - including battery backup cache or SuperCap

- when the TRC uses DAS storage

Guidance on hardware installation and basic setup.

- Configuration of Virtual-to-physical network interface mapping is design-dependent and not included in TRC definition.

- Configuration of adapters (such as Cisco VIC, 3rd-party CNA / NIC / HBA) is design-dependent and not included in TRC definition.

Design, installation and configuration of external hardware is not included in TRC definition, such as:

- Network routing and switching (e.g. routers, gateways, MCUs, ethernet/FC/FCoE switches, Cisco Catalyst/Nexus/MDS, etc.)

- QoS configuration of route/switch network devices

- Cisco UCS B-Series chassis and switching components (e.g.

Cisco UCS 6100/6200, Cisco UCS

2100/2200, Cisco UCS 5100)

- Storage arrays (such as those from EMC, NetApp or other vendors)

Configuration settings, patch recommendations or step by step procedures for VMware software are

not included in TRC definition.

Infrastructure solutions such as Vblock from Virtual Computing Environment may also be leveraged for

configuration details not included in the TRC definition.

NEW QUESTION: 3

What does "residual risk" mean?

A. A security risk intrinsic to an asset being audited, where no mitigation has taken place.

B. The security risk that remains after controls have been implemented

C. Weakness of an assets which can be exploited by a threat

D. Risk that remains after risk assessment has has been performed

Answer: B

Explanation:

Residual risk is "The security risk that remains after controls have been implemented" ISO/IEC TR 13335-1 Guidelines for the Management of IT Security (GMITS), Part 1: Concepts and Models for IT Security, 1996. "Weakness of an assets which can be exploited by a threat" is vulnerability. "The result of unwanted incident" is impact. Risk that remains after risk analysis has been performed is a distracter.

Risk can never be eliminated nor avoided, but it can be mitigated, transferred or accpeted. Even after applying a countermeasure like for example putiing up an Antivirus. But still it is not 100% that systems will be protected by antivirus.

NEW QUESTION: 4

What are the requirements for configuring a Samba file server to work in Active Directory mode? (Choose THREE correct answers.)

- A. Join a domain using the command: net ads join
- B. Synchronize time with the realm server
- C. Create an administrator account with pdbedit command
- D. Use Winbind the ADS mode with this command: windbindd -krb5
- E. Specify a realm in the smb.conf file

Answer: A,B,E
