NEW QUESTION: 1

Your network contains an Active Directory domain named contoso.com. The domain contains a server named Server1 that runs Windows Server 2012. Server1 has an enterprise root certification authority (CA) for contoso.com.

You deploy another member server named Server2 that runs Windows Server 2012 and has the Web Server (IIS) server role installed.

You need to designate a website on Server1 as the certificate

revocation list (CRL) distribution point for the CA. The solution must ensure that CRLs are published automatically to Server2.

Which two actions should you perform? (Each correct answer presents part of the solution. Choose two.)

- A. Configure a CA policy module.
- B. Create a file:// CRL distribution point (CDP) entry
- C. Configure an enrollment agent.
- D. Create an http:// CRL distribution point (CDP) entry.
- E. Configure a CA exit module.

Answer: A,D

Explanation:

A: To specify CRL distribution points in issued certificates - Open the Certification Authority snap-in. - In the console tree, click the name of the CA. - On the Action menu, click Properties , and then click the Extensions tab. Confirm that Select extension is set to CRL Distribution Point (CDP) . - Do one or more of the following. (The list of CRL distribution points is in the Specify locations from which users can obtain a certificate revocation list (CRL) box.) / To indicate that you want to use a URL as a CRL distribution point Click the CRL distribution point, select the Include in the CDP extension of issued certificates check box, and then click OK .

- Click Yes to stop and restart Active Directory Certificate Services (AD CS).

E: You can specify CRL Distribution Points (CDPs) in CAPolicy.inf. Note that any CDP in CAPolicy.inf will take precedence for certificate verifiers over the CDP's specified in the CA policy module.

Note:

CRLDistributionPoint

You can specify CRL Distribution Points (CDPs) for a root CA certificate in the CAPolicy.inf.

This section does not configure the CDP for the CA itself.

After the CA has been installed

you can configure the CDP URLs that the CA will include in each certificate that it issues.

The URLs specified in this section of the CAPolicy.inf file are included in the root CA certificate itself.

Example:

```
[CRLDistributionPoint]
```

```
URL=http://pki.wingtiptoy.com/cdp/WingtipToysRootCA.crl
```
