NEW QUESTION: 1

Identify two correct statements about ASN creation. (Choose two.)

- A. The ASN number is always auto-generated from a sequence number.
- B. Oracle WMS Cloud only allows creation of a single ASN from a PO.
- C. Oracle WMS Cloud allows creation of a single/multiple ASN from a PO.
- D. The ASN number can be system generated or manually entered.

Answer: C,D

NEW QUESTION: 2

Which two steps are required for RIP to redistribute IS-IS routes? (Choose two.)

- A. Apply the redistribution policy to RIP as export.
- B. Create a redistribution policy accepting the IS-IS routes.
- C. Apply the redistribution policy to IS-IS as import.
- D. Apply the redistribution policy to IS-IS as export.

Answer: A,B

NEW QUESTION: 3

Refer to the exhibit. The network administrator is trying to configure mutual redistribution between EIGRP and OSPF. Autosummarization in EIGRP 100 AS is disabled. After adding OSPF configuration to router B1, the network administrator checked the routing table of router B2, but none of the EIGRP routes appeared there.

To redistribute the EIGRP AS 100 routes into OSPF, which command should be added, or edited, on router B1 under router ospf 10?

- A. redistribute eigrp 100 subnets
- B. no auto-summary 10.0.0.0 255.0.0.0
- C. area 0 range 10.10.0.0 255.255.0.0
- D. redistribute eigrp 100 metric-type 1

Answer: A

Explanation:

Explanation When redistributing into OSPF without keyword "subnets", only classful networks will be redistributed. Classful networks here mean networks with the default major subnet masks (for example 10.0.0.0/8; 180.1.0.0/16; 200.200.200.0/24...). In fact, the routing table on the exhibit above is not totally correct. The network 192.168.110.0/24 will be redistributed and shown in the routing table of B2 even if the keyword "subnets" is not used because it belongs to class C with the default subnet mask of class C.

To make all the networks, including subnets appear in the routing table of B2 we must use keyword "subnets" when redistributing into OSPF. This is also an important thing to remember when redistributing into OSPF.
