**Answer: B**

**NEW QUESTION: 3**

Refer to the exhibit.

Which two problems are the most likely cause of the exhibited output? (Choose two.)

- A. HSRP misconfiguration
- B. physical layer issues
- C. transport layer issues
- D. VRRP misconfiguration
- E. spanning tree issues

**Answer: A, B**

Explanation:

When you see this error, it means the local router fails to receive HSRP hellos from neighbor router. Two things you should check first are the physical layer connectivity and verify the HSRP configuration. An example of HSRP misconfiguration is the mismatched of HSRP standby group and standby IP address. Another thing you should check is the mismatched VTP modes.

**NEW QUESTION: 4**

What best describes the difference between Automation and Orchestration?

- A. Automation refers to scripting Languages (Python, Ansible, etc) and orchestration refers to commercial products that control configuration deployment.
- B. Automation refers to an automatic process for completing a single task and Orchestration refers to assembling and coordinating a set of tasks and conditions.

**C.** Automation describes a hand-off configuration process while Orchestration refers to sets of automation tasks that require the network administrator to coordinate.

**D.** Automation refers to an automatic process for completing multiple tasks with conditions and Orchestration refers to executing tasks in parallel.

**Answer: B**
